

330w Russian Grand Circus Light Show Project

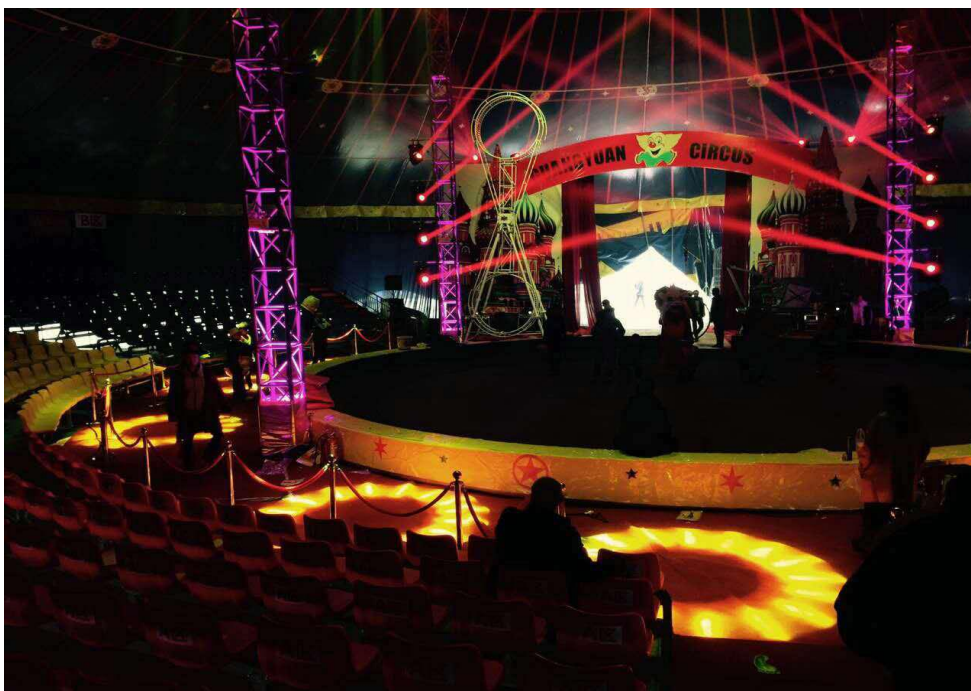

In May 2017, our company Mango lighting and the Russian Grand Circus Light Show launched a deep and professional cooperation.

From mid-March, we began to cooperate with Alexander, the head of the Russian Grand Show, to finalize all the plans and details of the light show, and successfully transported 330w beamlight to Russia in April.

This light show used 12 units 330w beam light and 4 units par light to present a high-level light show. This collaboration also achieved a complete success.

Now let's review the wonderful lighting effects:

Thanks for watching!
